About the project

The SAHARA program focuses on scaling up evidence based 'task sharing' interventions for perinatal mental health and early child development through delivery of comprehensive primary mental health care for first 1000 days of life. Sangath has successfully digitized Thinking Healthy Program- Peer (THPP) delivered; an evidence-based task sharing intervention for perinatal depression and developed Lalan Palan, a video-based parenting intervention for early child development.

We aim to scale these two interventions across 8 districts of Madhya Pradesh by digitally training community-based workers (ASHAs and Anganwadi workers) and provide them continuous supervision.
